Dear Chris

Thank you for requesting my assistance in creating a 3D floor plan for your project.

I create 3D floor plans for many buildings including nursing homes. What you are proposing is far different from what I have worked with in the past. Nursing homes are constantly under a cloud of controversy and in my opinion, through no fault of their own; there is a structure in place of how to care for the disabled which creates a very limited lifestyle for the disabled community.

Working on your project made me see that there is a way for disabled people to live with a large sense of independence while carers can observe without interfering and adding to the disabled person's insecurity.

The way of the future, in my opinion, is freedom housing, giving exactly that, freedom, to the disabled residence.

You have my full support and anything else you may need by way of 3D modelling, you have my services at your disposal.

Kind regards,

Leigh Henderson,
3D Pear.
